

Greetings,

My name is Michael Bowman, I'm a professional full stack engineer, team lead, and, Agile Scrum practitioner with years of professional experience, and, vast technical knowledge; across the full stack.

Some will say, "*Michael you are way too qualified for this position!*"

My response is, "*I love challenges, and I love working with people and technology. Just because I know what I'm doing does not mean the work is beneath me; on the contrary, it means I'm very good at what I do because I enjoy it and getting my hands dirty is all in a day's work!*"

My resume is attached. Please review it, and if you have any questions, don't hesitate to get back to me. My references, code samples, and resume speak to my abilities and successes.

You should consider me viable if you need accountability, transparency, and visibility from an engineer that can work fast, solve problems, apply design patterns, is ethical, is affordable, is team-oriented, can manage teams and projects, takes ownership, and, is a scrum master.

Thanks for your time,

Michael Bowman

Full Stack Architect / Developer / Scrum Master
